### Journal of Insect Biodiversity and Systematics (JIBS)

is an international peer-reviewed journal devoted to all aspects of insect diversity and systematics, both extant and extinct taxa. Various types of original papers in diversity and systematics including revisions, taxonomic monographs, nomenclatural notes, catalogues, descriptions of the new taxa, applications of biology and anatomy in taxonomy, biodiversity, historical biogeography, phylogeny, evolution, theoretical methodology in systematics, biogeographical distributional patterns, as well as regional checklists are welcome. JIBS publish papers in insect diversity and systematics from any part of the world. Extensive faunistic revisions on a group of insects throughout a country or wider bio-geographical region are welcome.

Both online and printed version of JIBS are publishing in compliance with current ICZN requirements. Journal of Insect Biodiversity and Systematics is jointly published quarterly by the Tarbiat Modares University (TMU) and Entomological Society of Iran (ESI).
